Exam in Calculus

First Year at the Technical Faculty for IT and Design and the Faculty of Engineering and Science

August 22, 2017, 9:00 – 13:00

This test consists of 8 pages and 12 problems. All problems are “multiple choice” problems. Your answers must be given on these sheets.

It is allowed to use books, notes, xerox copies etc. It is **not allowed** to use any electronic devices such as pocket calculators, mobile phones or computers.

The listed percentages specify by which weight the individual problems influence the total examination.
Problems 6(a), 9 and 11(c) may have more than one correct answer.
Your marks concerning these problems will be evaluated as follows: every wrong mark will annul one correct mark.

Remember to write your full name (including middle names) together with your student number below.
Moreover, please mark the team that you participate in.

Good luck!
